LOA UT 84747

Dear Bobby:

Re: Fremont River System
Distribution of Water

There has been some concern expressed about the distribution of water on some areas of the Fremont River. No specific complaint has been registered but a general concern that in some cases the delivery of water on the river was not based upon specific decreed rights or approved change applications.

This is a concern especially in dry years such as this. I just want to remind you water cannot be delivered from the river unless it's based upon a decreed right or approved change application and you should have that information before water is delivered to any water user.

If you need assistance in determining the water right basis for any particular diversion, please contact Kirk Forbush or myself.

Sincerely,

Lee H. Sim, P. E.

Assistant State Engineer
